Our Project

Our school has participated in the European Union Erasmus+ project, which targets 13-16 age group students from Poland, Lithuania, Italy and Romania. Our project will last for 24 months and aims to develop the basic skills and key competences of 400 students from 45 European schools. (The project started in 2020 and was postponed to 2022 due to the Covid-19 Pandemic.)

The goal of the project:

Through this project, we aim to create practical working models with students for self-learning, challenge their inner passion, and develop basic skills, creativity, problem-solving skills and emotional intelligence.

Project Activities

By the end of April 2023, increasing social sensitivity, cultural awareness, sense of initiative and entrepreneurship among students from 5 EU schools from 5 EU countries, activating students' emotional intelligence and social skills, promoting peer learning and communication, expanding students' international competences and self-expression. We planned a short-term student group exchange.

The project is aimed at a total of 500 students, of which 160 participants (40 teachers and 120 students) will be direct participants. The group of indirect participants consists of parents, school personnel, stakeholders, representatives of educational institutions, NGOs, mayor, school inspectors, parents, school personnel.
